

Briarcrest Veterinary Clinic, Inc.
Larry N. White, D.V.M.
1492 Wilcrest Drive
Houston, TX 77042

BRIARCREST IS A PAIN-FREE CLINIC, BECAUSE WE CARE!
*You can help protect your pet from unnecessary pain, by accepting
our practice's recommendation for pain relief medication.*

- Pets can't tell us when they hurt, so it can be difficult to know when they are in pain. But since the perception of pain is similar for humans and pets, we assume any condition or injury capable of causing pain in humans is also capable of causing pain in pets.
- Pain is more than an unpleasant sensation. If left untreated, it can lead to suffering and harmful physical effects, and actually interfere with the healing process.
- Our practice understands the importance of pain management and offers effective methods to meet your pet's specific needs.
- Administration of medication may be warranted before, during and/or after the procedure to reduce pain and discomfort for your pet and to promote a faster recovery.

How would you prefer any take home medication for your pet?
(Please check one)

- Liquid
- Tablet/Capsule
